

Company Overview

Madel Enterprises, LLC is a Small Business established 2009 with a focus on delivering quality service and integrity in contracting and support.

Providing a full range of electrical and low voltage solutions with quality project management and professional communications.

Our firm specializes in Engineering, Management, & Installations Services for Systems Integration. Including: Data/Voice Network Infrastructure, NICET Certified Fire System Design and Installers, Nurse Call, Pro Audio/Video, Access Control, Security, Intercom/Paging, Multimedia Distribution, and CATV/CCTV.

Whether it's a small project for a local community or a multimillion dollar contract with a federal entity, you can feel confident Madel has the staff to see it through to a successful completion.

Experience

Madel has extensive experience working in Hospital, Educational, Federal, and Commercial environment. Our leadership team has over 50 years of experience managing and installing a wide variety of electrical and system integration solutions, installation experience with very large systems including multi-million dollar fire alarm and nurse-call systems as well as 20 years' experience in project management of low voltage technologies.

With degrees in Business Management, licensed master electricians, NICET certified technicians and recognized industry leaders in a number of other disciplines, you can be sure you will be getting competent support on your project.

Madel's administration staff has a full understanding of contracting rules and applications in the private, state and federal sectors and strives to keep its staff apprised on changes in these areas to insure they remain fully capable of working within these often complex environments.
